PROFILE

Third-year Software Engineering student at Bule Hora University with hands-on experience building web applications and software projects. Familiar with HTML, CSS, JavaScript, TypeScript, Node.js, and PostgreSQL. Passionate about problem-solving, full-stack development, and creating practical software solutions. Eager to apply technical skills, collaborate with development teams, and continue learning through real-world projects.

EDUCATION

Bachelor of Science in Software Engineering
Bule Hora University, Ethiopia
Currently studying — Third Year

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, C++
Frontend Development: HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend Development: Node.js
Database Management: PostgreSQL, SQL, Relational Database Design
Tools & Platforms: Git, GitHub, Visual Studio Code, npm, Vite

FEATURED PROJECTS

GitHub User Search
Technologies: React, JavaScript, Vite, GitHub API
Built a web application that searches for GitHub users and displays profile information.
Number Guessing Game Pro
Technologies: React, JavaScript, Tailwind CSS, Vite
Built an interactive number-guessing game with randomized numbers and limited attempts.
Telegram Portfolio Bot
Technologies: Python, Telegram Bot API, Fadehost
A Telegram bot that presents portfolio information and provides links to projects and profiles.
3D-Login-Page
Technologies: HTML,CSS and JAvaScript
This project is a modern and responsive 3D Login Page built using HTML5, CSS3, and JavaScript. It features a user interface with smooth animations, interactive 3D card effects
